

within the cells to no longer be visible, thereby creating a color-changing effect.

In the Claims

Please amend claims 21, 24, 25, and 28 as follows:

21. (Amended) A reversible cosmetic composition comprising a thermochromic composition, and a mixture of thermochromic composition and a photochromic composition, whereby the composition comprises a thermoset resin, a fatty substance, water, a dye, and wherein the thermoset resin forms an outer shell of a chromic cell enclosing the fatty substance and dye within.

24. (Amended) A reversible cosmetic composition selected from the group comprising a thermochromic composition, a photochromic composition, and a mixture thereof, wherein the thermochromic composition comprises a thermostat resin, fatty substance, water, and dye; and wherein the photochromic composition comprises a benzene derivative and a binder.

25. (Amended) A method of manufacturing a reversible thermochromic cosmetic composition comprising: combining a thermoset resin, fatty substance, water, and dye to form thermochromic cells; and heating the cells for a time period sufficient to cure the resin.

28. (Amended) A method of manufacturing a reversible thermochromic/photochromic composition comprising: combining thermochromic cells resulting from combining a thermoset resin, fatty substance, water, and dye with the photochromic cells resulting from combining a

benzene derivative with a binder to form photochromic cells.
